GENERAL NOTES

LOAD AND RESISTANCE FACTOR DESIGN

DESIGN:
AASHTO LRFD Bridge Design Specifications, 8th edition and the California Amendments.
AASHTO LRFD Guide Specification for Design of Pedestrian Bridges, 2nd edition.

SEISMIC DESIGN:
Caltrans Seismic Design Criteria (SDC), Version 2.0

DEAD LOAD:
Includes 15 psf for future wearing surface

LIVE LOADING:
H10 & 90 psf pedestrian load

SEISMIC LOADING:
Soil Profile: Vs30 = 210 m/s (690 ft/s)
Moment Magnitude: 6.49
Peak Ground Acceleration: 0.36g
See Modified ARS Curve

CONCRETE:
fy = 60 ksi
f'c = 3.6 ksi unless otherwise noted
n = 8
See prestressing notes on Girder Layout sheets

PILE:
See "PILE DATA TABLE" on "FOUNDATION PLAN" sheet

ARS CURVE
5% DAMPING

SEISMIC LOADING DATA
Soil Profile (Vs30): 210 m/sec
Magnitude: M = 6.49
Peak Ground Acceleration (PGA): 0.36g

Note: Seismic Loading Data provided is consistent with Attachment 1 of Caltrans Memo to Designers 1-47.

The Design Response Spectrum for the Safety Evaluation Earthquake is based on the 2014 USGS Seismic Hazard Map for the 5% in 50 years probability of exceedance (975-year return period) with adjustment factors for near-fault and basin amplification effects.

NOTES:

- Alternatively, fillet or complete penetration welds may be used at anchor studs.
- Alternate types of anchor studs may be permitted subject to the authorization by the Engineer.
- Joint seal assembly to be used in conjunction with closure pour. (See other sheets for limits). Closure pour shall not be placed until final deck surface is within the tolerances specified.
- Use joint at crown of roadway, at any change in traverse slope in deck and at changes in horizontal direction. Place other joints at or near lanes. All metal parts to be painted or galvanized after fabrication.
- Sheet Neoprene shall be fabricated in one continuous piece and shall be fabricated to bend around corners. Field splices of the neoprene are not allowed.
- Insert assembly or expansion anchorage for 5/8" x 1 3/4" bolts. Use installation bolts extended 1/2" minimum past nut and coat with bond breaker, after concrete has cured, remove installation bolts, install HS bolts and sheet neoprene.
- Use sidewalk detail at all sidewalk joints. Use barrier detail low side at both sides if the roadway is crowned, or if the difference in elevation between the ends of the seal is 6 inches or less.
- a_c , a_s , are the thermal expansion coefficients for concrete and steel respectively.
- Anchor studs shall conform to ASTM 108.

17-415.1

Project Number

NOTES:

1. Field classification of soils was in accordance with the Caltrans Soil & Rock Logging, Classification, and Presentation Manual (2010). See Log of Test Borings Legend Sheets in the Caltrans Soil & Rock Logging, Classification, and Presentation Manual.
2. Standard Penetration tests were performed in accordance with ASTM D 1586-99 using a hammer operated with an automated drop system. Drill rods were 1 5/8-inch diameter "A"-rods; sampler was driven with brass liners.
3. "2.4 inch sampler": ID=2.4 inch, OD=2.9 inch, driven in same manner as SPT ("1.4 inch") sampler.
4. "2.9 inch sampler" is a Shelby Tube sampler.
5. If laboratory tests are not shown as being performed, the soil descriptions presented on the LOTB are based solely on the visual practices described in this Manual.
6. The length of each sample interval is shown graphically on the boring log. Whole numbers, based on "ft" represent the "standard penetration resistance" interval in accordance with the Caltrans Soil & Rock Logging, Classification, and Presentation Manual (June 2010). Where less than 0.5 feet of penetration is achieved, the blow count shown is for that fraction of the "standard penetration resistance" interval actually penetrated.
7. Consistency of soils shown in () where estimated.
8. Groundwater surface (GWS) elevations in the borings indicated on the Log of Test Boring Sheets reflect the fluid level in the borings on the specified date.
9. Groundwater elevations are subject to seasonal fluctuations and may occur at higher or lower elevations depending on the conditions at any particular time.
10. This LOTB sheet was prepared in accordance with the Caltrans Soil & Rock Logging, Classification, and Presentation Manual (2010)
